Subject: Re: Reporter called Adam Adams about Pasadena

'Hi, I'm ... with the Pasadena Citizen calling about the USOil Site in Pasadena. We met at the April public meeting, and I had some questions.

I'm glad to help. I couldn't make it to that meeting, but I tried to. What can I help you with.

"I'm saw the red containers at the site..."

Yes Ma'am. At the 400 North Richey site, the only waste remaining is the red vacuum boxes that are sealed up and awaiting disposal.

What other wastes are there?

At the 400 N Richey site, the bioreactor, 797 drums, 212 totes, 125 roll off

containers, and approx 24 above ground storage tanks have all been emptied and removed from the site. The only remaining waste there are the red vac boxes.

How many?

I'm sorry, I'm on an er in a different city and don't have the number handy, but they are only waiting for disposal slots at the disposal facility.

Was this site impacted?

The 400 N Richey site was not impacted. Had it been, the red vac boxes are sealed and cannot be flooded.

What about the rest of the site?

The 200 N Richey property is a former WWTP, that has concrete containments.

Was it impacted?

It's possible that 2 of the lower lying containments may have been, but they had very low concentrations of contaminants. I'm not saying that's not a big deal, just that the concentrations of the contaminants were very low from sampling.

Do you have the results?

I'm sorry I don't have them in front of me, I'm on an ER.

Who can answer additional questions about the analytical results?

John Meyer is over Remediation and can probably answer these questions with greater detail than I can at this moment. I'm sorry.

Can I quote you?

Of course. Thank you for calling.

Clarification- this is in regards to US Oil. Reporter just left him a message, no name or affiliation.
